At DriTal Technologies, we ensure to live by our motto i.e. to deliver every dream in digital. Thank you for giving us an opportunity to help you in achieving the dreams you desire. We have an enticing team of Business Managers, a hard-core Tech team and super Quality Assurance folks.

High Level Design

1. Client Requirement

To replicate the functionalities of MultiLogin.com, User should have free access to multiple Geolocations and liberty to Open any browser using multiple IPs and Profiles.

2. Phase - Designing

- a. WebRTC IP support on browser to open via multiple profiles and IPs using different Time Zones and Geolocations.
- b. Auto Session Restore i.e. to save all the profiles with their last activity.
- c. To avoid 100% DNS Leakage
- d. To achieve a platform independent proxy setting.
- e. Login on Cloud (Optional)
- f. Gui Designing
- g. Plug in support for browsers

3. Phase – Assembly

- a. Integrating GUI with backend Logic to perform as a standalone application.
- b. Integrating GUI with Browsers as Plug-Ins, to enhance user credibility and usage.

- c. Instancing and Synchronizing local logs/db with main logs/db.

4. Phase- Testing

- a. Extensive Testing using automated tools to check this application through and through.

5. Phase- User Acceptance Testing

- a. This would be a month's phase where in user would be given a chance to do hands on testing on the tool and recommend any faulty behavior or change in course.

6. Phase – Maintenance

- a. With all successful deployment, we would cater to any maintenance requirement on adhoc chargeable basis.
